**Document valid as at:** 30 March 2023

**You are about to purchase a product that is not simple and may be difficult to understand.**

### WHAT IS THIS PRODUCT?

#### Type:

The Fund is an alternative investment fund and a sub-fund of Formuesforvaltning Private Markets Plc (the "Company") which is an investment company incorporated in Ireland on 14 December 2006 under registration number 431649 and authorised by the Central Bank of Ireland.

#### Term:

In a normal situation, the term of the Fund is meant to be 8 years from the Fund's initial closure with the possibility of extension for up to 1+1 years. The Company may, under certain circumstances, unilaterally liquidate the Fund prematurely, see the prospectus dated March 31, 2023 (the "Prospectus") and the Supplement Real Estate 2024 regarding the Fund (the "Supplement").

#### Objectives:

The Fund's objective is to create a long-term capital return through investments in the other funds within the real estate asset class. The return is dependent on the underlying investments, which mainly consist of fund shares, but may also include stocks and shares in individual portfolio companies together with other property managers (so-called co-investments). The Fund will primarily invest in a selection of property funds within the EU and the UK, as well as to a certain extent other jurisdictions.

The Fund may also include funds domiciled in "off shore" locations such as Jersey, Guernsey or Cayman Islands ("Off Shore Underlying Funds"). The Fund may invest up to 100% of its Net Asset Value plus unpaid Capital Commitment in Off Shore Underlying Funds, subject to a maximum of 50% of the sum of its Net Asset Value plus unpaid Capital Commitment in any underlying fund.

Other features of the product which the typical investor should know:

- The base currency of the Fund will be Norwegian kroner NOK
- Investors should note that the Fund has limited liquidity and consequently, there will be no opportunity to redeem Shares in advance of the term of the Trading Period.
- Profits can be distributed or reinvested.
- The Fund is managed by Waystone Management Company (IE) Limited.

#### Intended Retail Investor:

The Fund is suitable for investors who are willing to invest for a long-term time horizon and understand that the money invested in the Fund can both increase and decrease in value and that is not certain that the invested capital can be recovered. The investor must be assessed as having sufficient expertise, experience and knowledge to adequately understand the investment in the Fund.

#### Practical information

The Depositary is Northern Trust Fiduciary Services (Ireland) Limited

The Prospectus together with the Supplement, annual report and other practical information are available free of charge in English via the link: <https://iqeq.aifusion.io/login>.

### WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

**The risk indicator assumes you keep the product for 10 years. You may not be allowed to redeem the investment early.**

#### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

**We have classified this product as class 6 out of 7, which the second highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact the capacity of the fund to pay you.**

**Be aware of currency risk. If your currency is different from the currency in which the Fund is denominated, the final return you get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

Further details of all of the risks associated with an investment in the Fund is set out under "Risk Factors" in the prospectus for the Company (the "Prospectus") and under "Investment Risks" supplement for the Fund (the "Supplement").

## Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended minimum holding period: 10 years Investment 100 000 SEK		
Survival Scenarios Minimum:		<b>10 years</b> (recommended holding period)
<b>Stress scenario</b>	<b>What might you get back after costs</b>	<b>64 720 SEK</b>
	Average return each year	- 4.26 %
<b>Unfavourable scenario</b>	<b>What might you get back after costs</b>	<b>144 350 SEK</b>
	Average return each year	3.74 %
<b>Moderate scenario</b>	<b>What might you get back after costs</b>	<b>171 540 SEK</b>
	Average return each year	5.54 %
<b>Favourable scenario</b>	<b>What might you get back after costs</b>	<b>200 530 SEK</b>
	Average return each year	7.21 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances.

\* The average return per year is calculated as follows:  $(\text{what you can get back after costs} / 100,000)^{(1/\text{RHP})}$  and therefore cannot be compared to the target internal return (IRR) of the fund as it is assumed that the commitment is paid in full upon entry and that total net proceeds are distributed after RHP years. An IRR that does take into account the effective timing of the capital released and repaid should therefore, ceteris paribus, be higher than the simulated return. (the target IRR for the fund is 14-17%)

## WHAT HAPPENS IF IQEQ FUND MANAGEMENT (IRELAND) LIMITED IS UNABLE TO PAY OUT?

The Fund's assets are legally separated from the PRIIP Manufacturer's. The Fund's assets are held by the Depositary. You may face a financial loss in the event of a default, insolvency or compulsory wind-up of the Depositary. However, this risk is mitigated to a certain extent by the fact that the Depositary is required to segregate its own assets from the assets of the Fund. Losses are not covered by any investor compensation or guarantee scheme.

## WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- SEK 100 000 is invested.

Investment 100 000 SEK	If you exit after 10 years
<b>Total costs</b>	<b>24 962 SEK</b>
Cost Impact	1.97 %

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.51% before costs and 5.54% after costs.

### Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
<b>Entry costs</b>	3.13% maximum of the amount you pay in when entering this investment. These costs are already included in the price you pay. Note that this is an estimate.	3 125 SEK
<b>Exit costs</b>	We do not charge an exit fee for this product, but the person selling you the product may do so.	N/A
<b>Ongoing costs</b>		
<b>Management fees and other administrative or operating costs</b>	2.00% of the value of your investment per year. Note that this is an estimate.	2 000 SEK
<b>Portfolio transaction costs</b>	0.00% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	0 SEK
<b>Incidental costs taken under specific conditions</b>		
<b>Carried Interest</b>	This product has no performance related fee. Underlying fund managers, however, normally receive 20% of the return, after the investors have received an annual return of 8%.	505 SEK

## HOW LONG SHOULD I HOLD IT AND CAN I TAKE MY MONEY OUT EARLY?

Recommended minimum holding period: **10 years**

The Fund must be held for the duration of the initial closing period and early liquidation of the investment is not possible.

## HOW CAN I COMPLAIN?

You can send your complaint to the AIFM as outlined below.

**E-mail:** complianceeurope@waystone.com

**Address:** Waystone Management Company (IE) Limited 4th Floor, 35 Shelbourne Rd, Ballsbridge, Dublin, D04 A4E0, Ireland

If you have a complaint about the person that advised you about this product, or who sold it to you, Waystone will indicate where you can complain.

## OTHER RELEVANT INFORMATION
